2.40(b)(3)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

The kennel facility consists of four sheltered buildings and one outdoor housing area. In the second sheltered building from the west there are three adults which need to be evaluated by the attending veterinarian. On the west side of the building there is an adult male Pekingese, chip # 079033051, which was observed excessively salivating and had brown and green matter on the right upper canine tooth. On the eastern side of the building there is one female Dashound, 471D1C205A, which has an accumulation of dark brown matter on the right canine tooth. On the same side of the building there is an adult female Chihuahua, chip# 4949196A4A, which has an enlarged red area between the two middle digits of the left front paw. On the eastern side of the third building from the west there is one adult male Maltese, chip# 0A01213506, whose eyes were glassey with no teeth and had holes in the gums where the canines were once located. These animals need to be evaluated by the attending veterinarian. The dealer must maintain written documentation of the evaluation and all treatment.

Affects four adults.

Correct by April 12, 2014

3.6(a)(1)

PRIMARY ENCLOSURES.

The kennel consists of four sheltered buildings and one outdoor housing area. On the first and third buildings from the west there are a total of two enclosures whose doors separating the interior from the exterior portions are missing or are off their hinges. Primary enclosures must be designed and constructed of suitable materials so that they are structurally sound. The primary enclosures must be kept in good repair to protect the contained animals from the elements and allow them to stay clean and dry.

Affects five adults.

Correct April 17, 2014

3.11(c)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

On the south side of the whelping building there is a small outdoor housing area. On the exterior of the three enclosures there is old bedding, old waste material, discard materials and plastic. This area needs to be kept

cleaned, maintained and in good repair to protect the animals from injury, to facilitate husbandry practices and to reduce or eliminate breeding and living areas for rodents and other pests and vermin. Premises must be kept free of accumulations of trash, junk, waste products, and discarded matter to facilitate cleaning of the premises and pest control, and to protect the health and well-being of the animals.

Affects six adults.

Correct by May 1, 2014

The inspection and exit interview was conducted with facility representative.
