Type: ROUTINE INSPECTION

Date: 15-JUL-2016

---

### 3.81(c)(2)

#### ENVIRONMENT ENHANCEMENT TO PROMOTE PSYCHOLOGICAL WELL-BEING.

During the on-site inspection of animal facilities, it appeared that all nonhuman primates were receiving basic enrichment as directed by the environmental enrichment plan. Animals requiring special attention under this section were receiving an extra enrichment device each week. The duration of interaction with this enrichment was less than one day. The success or failure of special attention being provided to these animals was not sufficiently documented to determine if the special attention was effective, and/or if adjustments were needed to help address the psychological distress. Correct by assessing and documenting the effectiveness of the special attention being provided, and implementing modifications to the environmental enrichment provided to these animals as needed and as approved by the attending veterinarian. To be corrected prior to the next inspection.

An exit briefing was conducted with the attending veterinarian.

#### Additional Inspectors

Brandes Robert, Veterinary Medical Officer
