Type: ROUTINE INSPECTION
Date: 25-AUG-2015

2.40(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

In "Whelping Building 1" there is a prescription bottle labeled as containing Ponazuril suspension with an expiration date of 3/16/15 and was ready for use with all the other medications. The licensee stated that she had recently used it on four puppies that were less than 16 weeks of age. Expired medications can have unknown results, reactions and effectiveness on the animals. The licensee must not use expired medication on regulated animals.

In the "Breed Row" sheltered housing there is a red and white male Cavalier King Charles Spaniel with no formal identification, but was named "Rusty". The matts on his chest, ears, tail, and front and back legs, were tightly bound. Tight matting can cause pain, hot spots, infection, and overheating. The licensee must remove the matts from this dogs hair coat.

The licensee must use appropriate methods to prevent, control, diagnose, and treat diseases and injuries.

TO BE CORRECTED BY: AUGUST 28, 2015

3.6(c)(1)(1)

PRIMARY ENCLOSURES.

The two weaned Cavalier King Charles Spaniel puppies kept in "Whelping Building 1" are in an enclosure with 4 square feet of space. The puppies are 16 and 17 inches in length, requiring a total minimum of 7 square feet. There are two pens housing four Golden Retriever puppies each that have 5.24 square feet of space. The average size of the puppies was 14 inches, requiring 2.78 square feet each, with a total of 11.11 square feet for each group of four puppies. These enclosures do not provide adequate space.

The animals need adequate space to make normal postural adjustments and for their growth and development. The licensee must provide adequate floor space equal to or greater than the length of the dog from the tip of nose to the base of the tail plus 6 inches, squared, for each animal in the enclosure if housed in groups.

Inspection Report

TO BE CORRECTED BY: AUGUST 27, 2015.

3.11(a)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

The four enclosures in the "Whelping Building 2 " housing four adult dogs and twenty seven puppies has an accumulation of feces. The licensee stated that she cleans the enclosures every other day and this was a day they were to be cleaned. The accumulation of feces can lead to disease hazard pests, insects and odors. The licensee must remove the feces from these enclosures and ensure that excreta is removed daily from all primary enclosures.

TO BE CORRECTED BY: AUGUST 26, 2015

3.11(b)(2)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

In the four used outdoor enclosures in "Breed Row "housing five dogs there is a build-up of dirt and debris in the shelters, and an accumulation of organic material on the inside rim of the food pans. The build-up of debris and organic material can become a disease hazard and attract pests. The licensee must clean and sanitize these shelters and food receptacle and ensure that all primary enclosures and food and water receptacles are sanitized at least once every two weeks using a method prescribed in paragraph (b)(3) or more often if necessary.

TO BE CORRECTED BY: AUGUST 31, 2015

The inspection and exit briefing were conducted with the licensee and ACI Stephanie Osborne.
