

Inspection Report

City Of Alamogordo
1376 East 9th Street
Alamogordo, NM 88310

Customer ID: **3484**
Certificate: **85-C-0003**
Site: 001
CITY OF ALAMOGORDO

Type: ROUTINE INSPECTION
Date: 20-SEP-2023

2.131(c)(1)

Repeat

Handling of animals.

The barrier fence in front of an enclosure housing two Nanday parakeets and one yellow-headed Amazon parrot is only 23" from the front of the enclosure. The public can come into direct contact with the animals inside because the public barrier fence is so close to the enclosure and cannot prevent this. Public barriers are important to protect both animals and people; people or animals can be injured by unauthorized direct contact and animals can become ill if they eat food or objects presented to them by people. The licensee must ensure that barriers between the general viewing public and the animals are of a sufficient distance, height and integrity so as to assure the safety of animals and the public.

3.154

Environment enhancement to promote psychological well-being.

Although the licensee is currently providing enrichment to the birds at the facility, there are no specific provisions listed in a plan for the environmental enhancement of birds related to social grouping, special considerations, restraint and exemptions.

The facility must further develop, document and follow a more complete, species appropriate plan for environmental enhancement adequate to promote the psychological well-being of birds. The plan must be approved by the attending veterinarian and, at a minimum, must address social grouping, environmental enrichment, special considerations, restraint, and exemptions to the plan.

TO BE COMPLETED BY 10/13/2023

This inspection and exit interview were conducted with facility representatives.
