2.75(b)(1)

RECORDS: DEALERS AND EXHIBITORS.

**** The animal inventory was not up to date at the time of the inspection. The licensee stated he had acquired 10 bear cubs on March 21, 2017. Licensee has no record of bears on inventory or acquisitions papers for the bears. Accurate animal records regarding births, deaths, acquisition and disposition are used to help evaluate the facilities animal care program and for animal tracking of ownership and health care concerns. Every exhibitor must make, keep and maintain records or forms which fully and correctly disclose the following information concerning animals purchased, acquired, owned, held, leased, or otherwise in his or her control, or were transported, sold, euthanized or otherwise disposed of by that exhibitor, including any offspring born of any animals while in his or her possession or under his control. Complete and detailed information for animals acquired for use in exhibition needs to be complete to ensure that all animals are acquired legally as well as transported and handled humanely.

To be corrected by April 25, 2017

This inspection and exit interview were conducted with licensee by Bill Heine ACI and an IES investigator.
