

## Inspection Report

Joyce Walters  
137 Walters Lane  
Anderson, MO 64831

Customer ID: 4311  
Certificate: 43-B-0178  
Site: 001  
JOYCE WALTERS

Type: ROUTINE INSPECTION  
Date: 17-JUN-2015

### 2.40(b)(2)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

1. Female brown dog, ID# 4C415D1559, had loose mattes, skin scab, and long toenails. Many of the dogs throughout the facility had long toenails. Lack of proper grooming can lead to health problems, such as injury and skin conditions. Adequate veterinary care must be provided which includes a preventative program to provide grooming, coat maintenance, and nail care.

TO BE CORRECTED BY JUNE 22, 2015

2. Male Chihuahua, ID # 4C302D6069, had hair-loss on his back, base of tail and tail, and green buildup on his teeth. Coat and skin maintenance are important to the overall well-being of an animal. Lack of dental care can cause pain and infection in dogs. Adequate veterinary care must be provided which includes a preventative program to provide dental care. This dog is to be taken to a licensed veterinarian for diagnosis and treatment plan for the skin and dental conditions. Written documentation for diagnosis and treatment plan is needed to present at the next inspection.

TO BE CORRECTED BY JUNE 19, 2015

### 2.75(a)(1)

#### RECORDS: DEALERS AND EXHIBITORS.

Disposition reports were incomplete. Missing information included, disposition date, buyer s information, and animal identification. Dealers shall make, keep, and maintain records or forms which fully and correctly disclose the disposition of the animals.

TO BE CORRECTED BY JUNE 18, 2015

### 3.1(c)(6)

#### HOUSING FACILITIES, GENERAL.

The gravel in a minimum of nine pens was mixed with a brown substance that was soiling the dogs. There were standing puddles of a yellowish brown liquid.

The dogs were wet and soiled and the conditions are conducive to harboring disease.

## Inspection Report

---

Gravel floors must be raked or spot-cleaned with sufficient frequency to ensure all animals the freedom to avoid contact with excreta. Contaminated material must be replaced whenever this raking and spot-cleaning is not sufficient. TO BE CORRECTED BY JUNE 22, 2015

### 3.2(b)

#### INDOOR HOUSING FACILITIES.

An odor of ammonia was prevalent throughout the indoor facility used for whelping.

Ammonia can adversely affect the respiratory system of the animals housed within the building.

Indoor facilities must be sufficiently ventilated at all times when dogs are present to provide for their health and well-being, and to minimize odors, drafts, ammonia levels, and moisture condensation.

TO BE CORRECTED BY JUNE 19, 2015.

### 3.4(b)(3)

#### OUTDOOR HOUSING FACILITIES.

The three dog houses in the outdoor kennels housing adult dogs did not have wind and rain breaks. Dogs were not able to get out of inclement weather. Shelters in outdoor facilities must have at the entrance wind and rain breaks.

TO BE CORRECTED BY JUNE 24, 2015

### 3.6(a)(2)(7)

#### PRIMARY ENCLOSURES.

A metal pipe along the edge of the side along the floor surface of the enclosure that helps prevent the dogs from digging had deteriorated creating sharp edges at the end. Sharp points and jagged edges can cause injuries to the dogs. Primary enclosures must be constructed and maintained so that they have no sharp points or edges.

TO BE CORRECTED BY JUNE 24, 2015

### 3.11(c)

#### CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

Weeds were growing up on the outdoor section of the sheltered housing. This interferes with the cleaning, and pest control. Weeds, grasses and bushes must be controlled so as to facilitate cleaning of premises and pest control, and to protect the health and well-being of the animals.

TO BE CORRECTED BY JUNE 24, 2015
