Type: ROUTINE INSPECTION
Date: 09-FEB-2017

2.75(a)(1)(i)

RECORDS: DEALERS AND EXHIBITORS.

There are no records of acquisition present for the 2 Poodle puppies . Facility owner stated the seller was a USDA licensed dealer but did not bring records with her at the time of sale. Records must contain the name, address, vehicle license number and whether the person was required to be licensed.

CORRECT BY : 2-16-17

3.1(c)(1)(i)

HOUSING FACILITIES, GENERAL.

The coated wire floor grate in 3 puppy enclosures have areas where the coating is chipped and metal surface is exposed and rusting. Rusted surfaces can not be properly cleaned and sanitized. All surfaces must be maintained in good repair to allow for proper cleaning and sanitization.

CORRECT BY : 2-23-17

3.6(a)(2)(x) REPEAT

PRIMARY ENCLOSURES.

Flooring in the puppy enclosures is coated expanded metal . The smallest male Chihuahua puppy was observed walking on the grated floor. As he walked and stood, part of his foot (toes and pads) were observed passing thru the opening in the grated floor. Two young Poodle puppies were reluctant to leave their bed. When they were removed from the solid surface of the the bedding, they walked in an abnormal and difficult manner . Part of their feet (toes and pads) were also observed passing thru the flooring. Flooring with openings this large may result in injuries to feet and legs. All flooring must be repaired or replaced and maintained to protect the animals feet and legs from injury and must not allow their feet to pass thru any openings,

This was also a problem on inspection dated 6/30/17

Inspection Report

3.50(a)

FACILITIES, GENERAL.

One rabbit enclosure housing 3 rabbits had clear packing tape used to support one corner of the enclosure. The tape may be ingested by the rabbit and may not provide enough support to maintain the structural strength of the wall. The wall must be repaired or replace to protect the animals from injury.

CORRECT BY : 2/10/17

3.53(c)(2)

PRIMARY ENCLOSURES.

Three rabbits weighing approximately 4 lbs each were housed together in an enclosure that measured approximately 4 square feet . Each rabbit of this size requires a minimum of 1.5 sq. feet each . The current enclosure is not large enough to provide each rabbit with the minimum space required. An enclosure that provides at least minimum space per rabbit must be provided.

CORRECT BY: 2-10-17

The inspection was conducted with store employee and the exit briefing with the owner.
