Type: ROUTINE INSPECTION
Date: 10-JUL-2017

2.40(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

*** Female brown and white Shih-Tzu (#71) was found with a reddish-purple, fluid-filled swelling between the toes of the right front and right rear feet. There was a small amount of reddish-clear discharge from this mass on the right front, the mass on the right rear appeared to have ruptured and had no obvious discharge. The mouth of this dog had excessive tartar, gum recession, and reddened gum lines mostly noticeable on the left side of the mouth. The licensee immediately began treatment on the feet according to his written plan of veterinary care. Failure to provide timely treatment for medical conditions can lead to pain and suffering in the animals. Correct this by contacting your attending veterinarian and following the guidance that is provided for both the feet and future dental treatment.

Correct by: 14 July 2017
