Type: ROUTINE INSPECTION
Date: 14-DEC-2017

3.84(d)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

Food preparation area: An accumulation of rodent feces was noted on the inside shelves of a storage cabinet and also on the top surface of the refrigerator. Currently, there is no pest control program in place which addresses rodent pests. Rodent feces may contaminate food and present a potential disease hazard to the animals. A safe and effective program for the control of rodent pests must be established and maintained in order to promote the health and well-being of the animals.

Correct by 12/25/2017.

This inspection and exit interview were conducted with a facility representative.
