P.O. Box 1197
Pine Mountain, GA 31822

Customer ID: **32761**
Certificate: **57-C-0221**
Site: 001
Wild Animal Safari Inc

Type: ROUTINE INSPECTION
Date: 24-APR-2025

2.40(b)(3)

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

During inspection, two animals were identified with conditions requiring veterinary consultation:

- The tiger goliath had a circular ulcerated lesion on the back of his left hip, below the tail. The affected area was approximately 1.5 inches in diameter and was not covered with skin or fur revealing a pinkish-red fleshy lesion. A moderate amount of pinkish-red discharge was seen going from the lesion down the left leg and behind the tail.
- A brown fallow deer in the drive thru section was seen with an abnormal right eye. Most of the eye was made up of an amorphous cloudy whitish-blue film.

The facility had not identified the conditions affecting these two animals, therefore had not contacted the veterinarian for guidance on care. Failure to promptly identify injuries delays treatment and may cause undue pain and distress in animals with such conditions. A more rigorous method of daily observation of all animals must be implemented to properly assess their health and well-being. Direct and frequent communication with the attending veterinarian is required for timely diagnosis and adequate medical attention. Correct by April 30th, 2025.

2.131(c)(1)

Handling of animals.

In the drive thru safari area, the public is permitted to offer feed to the animals anywhere along the route. Some animals, including eland, zebra, elk, emus and ostriches, extend their heads and necks through open windows and into vehicles. This type of interaction poses a significant risk of injury to both the animals and the public. During public exhibition, any animal must be handled so there is minimal risk of harm to the animal and to the public, with sufficient distance and/or barriers between the animal and the general viewing public so as to assure the safety of animals and the public. Correct by July 30th, 2025.

This inspection and exit interview were conducted with facility representatives.

Additional Inspectors:

Louis Divincenti
