Type: ROUTINE INSPECTION  
Date: 17-AUG-2021

**2.38(f)(1)**                      **Critical**                      **Repeat**

### Miscellaneous.

-Seven different handling incidents have caused serious injuries to non-human primates when they were loose inside the room. The cause of three incidents were improper lock placement/procedure (8/28/19, 9/19/2019, 3/20/21) and four incidents occurred in relation to use of a transport/transfer box (7/13/2020, 7/17/2020, 9/30/2020, 2/11/2021). Most injuries were from uncontrolled interactions with other non-human primates in the room and involved partial loss of tongues in some animals, partial digit amputations, and wounds that required suturing. One non-human primate sustained a tail injury (7/13/2020 incident). Animals involved were provided veterinary care and monitored for full recovery of wounds. The facility had reported these incidents to the overseeing ACUC and to OLAW (when applicable) and has continued to take steps to prevent further occurrence of incidents.

-A marmoset sustained a foot injury when a door to its enclosure was accidentally closed on its foot (2/6/2021). The injury required multiple surgeries and digit amputations. The incident was promptly reported to veterinarian staff and it received prompt veterinary care. The incident was also reported to the overseeing ACUC and OLAW.

## Inspection Report

---

Incidents that cause injuries listed above cause pain and discomfort to animals involved. Ensure that corrective procedures are followed to prevent further occurrences.

This inspection and exit interview were conducted with facility representatives. This was an inspection of the non-human primates and records maintained under the LSVAC ACUC.

Additional Inspectors:

DAWN BARKSDALE, VETERINARY MEDICAL OFFICER
