Site: 001

Iron P Homestead LLC

Type: RE-LICENSE INSPECTION

Date: 02-OCT-2023

2.40(b)(3)

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

The following observations were noted during inspection:

- A blue and gold macaw named Gigi had several black and white clumps of fecal mixed with urinary waste attached to the vent. The feathers around the area were stained with a greyish/white chalky substance.
- Numerous black specks were seen on the neck, below the chin of one of the four coati. A flea like insect was also seen moving along the fur in that area. A similar insect was seen between the fur on the back of another coati. Two of the animals were seen chewing at their tale and scratching their back as well as side during inspection.

The licensee had not identified the conditions affecting these animals prior to the inspection, so the veterinarian had not been contacted. Failure to promptly identify such conditions delays appropriate treatment and may cause undue discomfort to the animals. Direct and frequent communication with the attending veterinarian is required for timely diagnosis and adequate medical attention.

3.127(d)

Facilities, outdoor.

Most of the animals within the facility, including dangerous animals such as bears and cougars, have outdoor housing. The perimeter fence located near the facility entrance was about 4 inches short of the required 8 feet. The perimeter fence behind the warthog enclosure had many areas of vegetation overgrowth leaning on top of the fence. The lack of an adequate perimeter fence presents a safety risk to the animals within the facility in that there isn't an adequate secondary containment system to hold animals that may escape their primary enclosures, or a sufficient barrier to keep animals and unauthorized persons out. The facility must ensure they maintain 8-foot-high perimeter fencing for dangerous animals, and 6-foot-high fencing for both non-dangerous animals and non-human primates. Such fences must be at least 3 feet in distance from the primary enclosure for outdoor housed animals.

This is a 1st Re-License Inspection for a Class "C" license. The inspection and exit briefing were conducted with the applicant.

All items must be in compliance within 2 more inspections or by December 2nd, 2023 or the applicant will forfeit the
