3.13(a)(3)

Veterinary care for dogs.

The facility has no guidance provided in their Program of Veterinary Care for the percentage or total number of dogs to be sampled and the frequency of which they should be tested for heartworm and intestinal parasites. The facility has conducted heartworm testing and fecal testing on the dogs. However, the testing has not been conducted in accordance with a written and approved schedule.

Fifty-three adult dogs have not received vaccinations for distemper and parvovirus in accordance with the guidance that is provided in the Program of Veterinary Care.

Each dealer must follow an appropriate program of veterinary care for dogs that is developed, documented in writing, and signed by the attending veterinarian and includes vaccinations for contagious and/or deadly disease (including rabies, parvovirus, and distemper) and sampling and treatment of parasites and other pests. Sampling of dogs for parasites and providing vaccinations in accordance with the Program of Veterinary Care is necessary to ensure the animals are receiving adequate veterinary care.

Correct by adding the number or percentage of dogs to be sampled for heartworms and intestinal parasites to the Program of Veterinary Care and have that schedule approved by the attending veterinarian. Additionally, the facility must also ensure that all dogs are vaccinated for contagious and/or deadly disease in accordance with the written Program of Veterinary Care.

This is a 1st Re-License Inspection for a Class "A" license. The inspection and exit briefing were conducted with the applicant.

All items must be in compliance within 2 more inspections or by 06-May-2024 or the applicant will forfeit the license fee and must wait 6 months to reapply. Please contact your inspector to schedule your next Re-License Inspection.
