3482 County Route 31
Greenwood, NY 14839

Customer ID: **505075**
Certificate: **21-A-0200**
Site: 001
HARVEY MILLER

Type: ROUTINE INSPECTION
Date: 16-SEP-2019

2.40(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

*** Dogs identified as # 005, 009 and 010 all have matted fur around the ears, under the neck and along the legs and anal region. Matted fur can pull and separate from the skin causing skin irritations and be painful. In addition some of the fur around the anal region had trapped feces. These dogs need to be groomed on a routine basis to prevent this matting from occurring.

*** Dogs identified as # 005, and 010 both had brown tartar along the teeth with red irritated gum lines. These dogs need to have their teeth assessed by the attending veterinarian to determine the course of action and possible treatment or cleaning options.

*** Dog identified as 009 had dirty ears that appeared moist and red with an odor indicating a possible infection. This dog needs to have her ears cleaned and checked on a regular basis to prevent this condition.

Correct by: Sept 23, 2019

3.1(e)

HOUSING FACILITIES, GENERAL.

*** There was an open bag of puppy food that needs to be placed in a leak proof container with a tightly fitting lid. This is to assure the food is protected from potential contamination and deterioration.

Correct by: Sept 21, 2019

3.11(b)(2)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

*** According to the licensee, the facility is having a bedding change out every two weeks, but the enclosures are not being cleaned and sanitized using methods in paragraph (b)(3). There was a strong odor in the kennel as a result. It is important that primary enclosures are cleaned and sanitized at least once every two weeks to remove organic materials and effectively clean the kennel to reduce odors and disease hazards.

Correct by: Sept 23, 2019

3.11(d)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

*** There was an abundance of live and dead flies around the facility and enclosures, with no methods in place to control or reduce the amount of flies. In addition the accumulation of dead flies needs to be removed from the window ledges to reduce disease hazards. An effective program for the control of insects must be established and maintained so as to promote the health and well-being of the animals.

Correct by: Sept 24, 2019

This inspection and exit interview were conducted with the licensee.
