BONNIE CROMWELL & RICHARD PENNINGTON

Type: ROUTINE INSPECTION

Date: 28-APR-2015

3.125(a)

FACILITIES, GENERAL.

In the genet's enclosure there is a wooden nest box. Inside the box it was observed that there is paint peeling off of the wooden surface.

Peeling paint presents an ingestion risk, and impedes cleaning. Nest boxes, and all surfaces in animal enclosures, should be kept in good repair and maintained or replaced on a regular basis, in order to facilitate adequate sanitation, and to protect the animals from harm.

To be corrected in all enclosures by 6/28/15.

3.131(c) REPEAT

SANITATION.

Around the facility grounds there is an accumulation of items that are not in use; plastic containers, unused fencing and building materials, tarps, unused kennels, and items to be discarded. The presence of these items creates clutter that impedes housekeeping, and could provide habitat for vermin, which could negatively impact the health and well-being of the animals. The grounds should be maintained clean and free of debris so as to accommodate good husbandry practices.

Previously cited in October, 2012, with a correction date of 12/10/12.

An exit briefing was conducted with the licensee.
