SALLY L REAVES

Type: ROUTINE INSPECTION
Date: 21-OCT-2014

2.40(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

One of the pigs had moderately overgrown hooves, one of which, on the left rear leg was starting to curl upward. Overgrown hooves or nails may be prone to damage or cause lameness in the animal. The facility must use appropriate methods to prevent diseases and injuries for the health and well-being of the animals.

Correct by Oct 31, 2014

3.130

WATERING.

The water for the ferrets had mild to moderate algae accumulation inside the receptacle. The facility described that a bottle brush and non-toxic cleanser are used as their method of cleaning but a frequency must be developed such that cleanliness is maintained for the health and well-being of the animals. The facility cleaned the water bottle at the time of inspection.

This item was corrected at the time of inspection.

3.131(c) REPEAT

SANITATION.

There is grime and rust buildup on the coati enclosures. Grime and rust may prevent effective cleaning and husbandry practices therefore could cause harm and / or injury to the animals.

There is flaking paint on the platform in the porcupine enclosure. The flakes could be inadvertently ingested by the animal and cause harm or injury.

The premises must be kept clean and in good repair in order to protect the animals from injury and to facilitate husbandry practices.

An exit briefing was conducted with the licensee and facility representatives at the time of inspection on Oct 21,
