Type: ROUTINE INSPECTION
Date: 24-MAY-2017

2.40(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

Each breeder must provide and maintain programs of adequate veterinary care for all dogs in the kennel and use appropriate methods to prevent, control, treat diseases, injuries, and assess their health daily. A white wheaten terrier male, identification number 00071968fFB, has matted hair. These mats cover a very big area of the dogs coat. The mats are pulling the hair together leaving areas of skin showing. The mats are around the legs and feet, too. Mats can lead to irritations that can cause open wounds and hot spots that can be very uncomfortable and lead to infection that can harm dogs. The breeder must put into place a good system that addresses the hair coat of each dog in this kennel to ensure that the best health and good care is being provided at all times. The owner must trim this dogs hair coat and remove all mats by 05-31-2017

3.11(a)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

Excreta must be removed from enclosures daily and more often if needed to prevent an excessive accumulation of feces. Daily cleaning of feces also helps to reduce disease hazards, insects, pests and odors. One of the enclosures in the old kennel housing two dogs, needs to be cleaned at least once a day and more often if needed. The owner must put into place a good cleaning program that cleans all dog enclosures at least once a day and then sanitizes at least twice a month. Owner stated the program in place for this kennel area is cleaning feces three to four times a week. Adequate cleaning can help dogs to stay comfortable and healthy, The owner must clean this kennel enclosure by close of this day. 05-24-2017.

This inspection and exit briefing were conducted with the owner and Karl Thornton, ACI.
