Type: ROUTINE INSPECTION  
Date: 28-FEB-2023

---

### 3.77(f)

#### Sheltered housing facilities.

The outdoor area of a sheltered housing facility containing two adult black-handed spider monkeys is not completely enclosed by a perimeter fence. The outdoor area of the enclosure has chain link walls and roof, beyond which there is some additional fencing of various heights. However, there is not one continuous 6 feet tall perimeter fence. A perimeter fence is essential for preventing contact between exotic animals and unauthorized people or animals. A perimeter fence also acts as a secondary containment system in the event an animal escapes from its primary enclosure. Correct by May 02, 2023, or by obtaining approval from the Administrator for alternative measures.

This inspection and exit interview were conducted with a facility representative.
