PARK

Type: FOCUSED INSPECTION

Date: 02-NOV-2023

3.61(a)

Primary enclosures used to transport live rabbits.

The primary transport enclosures for the rabbits did not contain easily accessible openings, projecting rims, or adequate handholds.

A lack of easily assessable openings, projecting rims, and handholds on primary transport enclosures can make it difficult to remove the animal in the case of an emergency, allow for inadequate ventilation if the cages are stacked, and can cause tilting or unintentional contact between the handler and the animal during transport.

All primary transport enclosure for rabbits must contain openings that are easily accessible at all times for emergency removal of live animals, contain projecting rims or other devices on the exterior walls to prevent obstruction of the ventilation, and provide adequate handholds for lifting animals without tilting or risk of contact with the animal.

Correct by 11/10/2023.
