### 2.40(b)(2)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

\*\*\* The wolf hybrid has several large areas of matted fur hanging down by the hind legs. Once the fur becomes matted, it pulls and separates from the body, which can cause skin irritation. Additionally, the fur no longer adequately protects the animal from the elements. These mats need to be removed to prevent these issues and for the comfort of the animal.

### 3.56(a)(1)

#### SANITATION.

\*\*\* The overhang area in the rabbit pen has an accumulation of hair, cobwebs and debris in the top and sides mesh. This enclosure needs to be cleaned more frequently to reduce this accumulation for the health of the animals.
