### 3.127(d)

#### Facilities, outdoor.

The facility does not have a complete perimeter fence. A perimeter fence must be constructed so that it protects the animals in the facility by restricting animals and unauthorized persons from going through it or under it and having contact with animals in the facility. Additionally, it serves as a secondary containment system for the animals in the facility. The perimeter fence must be of sufficient distance from the outside of the primary enclosure to prevent physical contact between animals inside the enclosure and animals or persons outside the perimeter fence. A facility housing dangerous animals such as bears require an 8-foot-tall perimeter fence.
