Type: ROUTINE INSPECTION  
Date: 07-SEP-2017

### 2.40(b)(2)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

\* Both eyes for a black, female, Poodle born on 12/10/16, (not identified, but identified as PO27 on APHIS form 7005), were depressed into their orbital cavities. Very little of the whites of both eyes were visible. Both eyes had discharge and the hair was wet around the eyes. The dog was not very responsive to hand movement in close proximity to the eyes. This condition of the eyes the animal could have been born with or could be other medical conditions. Both eyes can be painful and cause discomfort to the animal.

- This dog was favoring its front left leg when walking or was limping. While standing in normal position the animal would hold the left leg off the floor. The lower leg (ulna and radius bones) were hyper-extended below the elbow joint. This leg injury can be result of various medical conditions. This leg injury can be painful and cause discomfort to the animal.

The licensee must have this animal examined by a veterinarian to obtain an accurate diagnosis and appropriate treatment plan for the eyes and the front left leg. The outcome of this consultation must be documented and provided to the inspector upon request. The licensee must ensure that all animals receive adequate veterinary care at all times.

To be corrected by, 11-September-2017.

This inspection and exit interview were conducted with the facility representative and Randall Wagner (ACI) on 7-September-2017.

This inspection will be sent by both regular and certified mail.  
USPS Tracking#: 9590940227566351142141.
