Type: ROUTINE INSPECTION  
Date: 09-DEC-2015

### 3.127(b)

#### FACILITIES, OUTDOOR.

\*\*\* The shelter for the deer pens on the right side of the guest walk way need to be addressed. The current shelter is just a roof over a feed area. There are no sides to the area to provide protection from inclement weather for older animals who may need it. A shelter should have a roof and two sides to block the wind and to prevent discomfort to the animals.

Correct by: Jan 30, 2015

### 3.131(a)

#### SANITATION.

\*\*\* There is an accumulation of feces in the zebra enclosure along the first wall as you walk down the guest path. The licensee states that they are not able to get into the enclosure and clean due to the aggressive nature of the zebra so the enclosure is not cleaned with any frequency. This needs to be addressed and some method of cleaning needs to occur to remove waste as often as necessary to minimize disease hazards and odors. This needs to be addressed for the health of the animal.

Correct by: Jan 11, 2015

An exit briefing was conducted with the licensee at the time of the inspection.
