Site: 001
JEAN BUEHL

Type: ROUTINE INSPECTION
Date: 22-MAR-2016

2.40(a)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

The licensee is adding a product called Vi-tal to the water for the rabbits. This treatment is not listed and approved by the attending veterinarian on the approved written Program of Veterinary Care plan. Since there is no written documentation regarding this treatment, it can not be determined whether the attending veterinarian has been given appropriate authority for the provisions of adequate veterinary care and to oversee the adequacy of other aspects of animal care being provided. This may lead to failure to deliver adequate veterinary care to the animals. The licensee must consult with the attending veterinarian regarding all treatments given to the animals to ensure they are appropriate and ensure the attending veterinarian is given appropriate authority and oversight over the care of the animals. All treatments must be included in writing as part of the written Program of Veterinary Care and approved by the attending veterinarian. Correct by April 5, 2016.

2.40(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

A male beige chinchilla needs to be evaluated by the attending veterinarian. The left eye was observed to only open half way and the animal kept the eye in a squinted position. This eye issue has not been evaluated by the attending veterinarian for diagnosis and recommended course of action. The eye issue may be causing discomfort to the chinchilla or lead to other more serious issues, if left unaddressed. The licensee must have this animal evaluated by a veterinarian for diagnosis and recommended treatment. Documentation must be maintained regarding this veterinary evaluation and kept by the licensee for review by APHIS officials on subsequent inspections. Correct by March 29, 2016.

2.75(b)(1)

REPEAT

RECORDS: DEALERS AND EXHIBITORS.

Records requirements.

The facility still is not maintaining complete records that contain all the required information. This includes the following:

*2 rabbits acquired on 1/19/16 where the driver's license number and state and vehicle license number and state

Inspection Report

were not obtained from the person the animals were acquired from. These rabbits were sold on 1/21/16 and an address of the buyer was not recorded.

*9 rabbits acquired on 1/20/16 where the driver's license number and state and vehicle license number and state were not obtained from the person the animals were acquired from. These rabbits were sold on 1/21/16 and an address of the buyer was not recorded.

*3 dwarf hamsters sold on 1/19/16 with no recorded address of the buyer.

*No disposition records for 1 hedgehog acquired on 1/18/16, 2 Roborovski hamsters acquired on 2/18/16, 4 Syrian hamsters, 1 Russian winter white hamster and 3 Roborovski hamsters acquired on 2/22/16, 1 Russian winter white hamster acquired on 3/7/16, 3 Roborovski hamsters acquired on 3/17/16, 8 Russian winter white hamsters present on the last inspection dated 1/5/16 that are no longer on premises and 4 guinea pigs present on the last inspection dated 1/5/16 that are no longer on premises.

*7 chinchillas present on this inspection with no record of acquisition.

*One record that says 4 hedgehogs dated 3/4/16 that includes the name of a person and city and state but does not indicate whether this is an acquisition or disposition record. The complete address of the person is not recorded on the record. If this is an acquisition record, it also does not contain the driver's license number and state and vehicle license number and state of the individual.

*There are a few other records that consist of Mapquest printouts with a street address, city and state but no other information to determine what type of record it is (disposition or acquisition of animals). Additionally, there is no indication as to the number and species of animals and date of transaction.

Incomplete records do not allow for tracking of the animals, ensuring that they came from licensed, or exempt from licensing sources, and does not allow for monitoring of mortality. The licensee must develop and maintain complete and up-to-date records that contain all required information.

Inspection and exit interview were conducted with the owner and along with Kevin Wilken, ACI.
