Kayla Mulder  
1674 Jefferson Ave  
George, IA 51237

Customer ID: **332414**  
Certificate: **42-A-1503**  
Site: 001  
Kayla Mulder

Type: ROUTINE INSPECTION  
Date: 22-MAR-2018

### 3.1(b) REPEAT

#### HOUSING FACILITIES, GENERAL.

\* The floor of the whelping building was 30 percent covered with an accumulation of shredded paper. There were small metal feeders, heat lamp covers, a soiled roll of carpet, section of sock adsorbing plastic, can of paint and a bucket with deer antlers on the floor. These item(s) can attract and provide living and breeding areas for vermin, pests and other rodents. Thus, increasing the disease potential for the seven adult dogs and 29 puppies.

For the prevention of insects, pest, vermin and disease hazards, all animal areas must be free of accumulations of trash, shredder paper, soiled rolls of carpet, tools, heat lamp covers, metal feeders and other discarded matter.

### 3.9(b)

#### FEEDING.

\* Two metal self-feeders, used to feed a total of nine adult dogs, had an accumulation of brown debris or caked on feed. This buildup was located in the part of the metal feeder where the dogs eat from. This indicates the feeders are not being cleaned and sanitized often enough and can increase the disease potential for the dogs.

For the prevention of an accumulation of debris, caked on feed and disease hazards, all feeders must be cleaned and sanitized more often in accordance with Section 3.11(b) (3) of the regulation.

To be corrected by, 30-March-2018.

This inspection and exit interview were conducted with the facility representative and Randall Wagner (ACI).

This inspection report will be sent both regular and certified mail.  
USPS Tracking#: 9590940227566351142196.
