Type: ROUTINE INSPECTION
Date: 22-APR-2021

2.75(b)

Records: Dealers and exhibitors.

Records containing required information pertaining to the animals housed at the facility were not available for review at the time of inspection. Information related to all regulated animals housed at the facility must be maintained and available for review. All animals born on the premises which are used for regulated purposes must be documented. The facility must develop a system of record keeping and maintain those records for review.

*****Correct by May 6, 2021

3.75(c)(3)

Housing facilities, general.

The enclosure for the marmosets had an excessive buildup of debris observed on the enclosure bars as well as the perching and resting surfaces. There was also areas of rust and pitting of the enclosure bars. This condition can harbor disease causing pathogens and can be hazardous to the health of the animals. In addition, this condition can compromise the strength of the enclosure. Hard surfaces with which non human primates come in contact must be cleaned and sanitized in order to prevent excessive accumulation of excreta.

Inspection Report

3.131(c)

Sanitation.

1. A tree was observed leaning on the fencing of the sheep enclosure. This was causing the enclosure fencing to sag downward. Enclosures need to be maintained in good repair.
2. There was section of enclosure fencing between the llama pen and the cow enclosure which was broken with jagged wires. In addition, a pile of fencing wire and metal debris was observed in the llama pen, as well as an electrical wire and an outlet coming out of the ground. This could lead to the llamas getting a limb entrapped or potentially getting injured. All enclosures must be kept in good repair and free of clutter and debris.
3. The indoor enclosure housing porcupines had a buildup of dirt and debris. Enclosures and receptacles must be cleaned as often as necessary in order to prevent excessive buildup of debris.

*****Correct by May 8, 2021

This inspection and exit interview were conducted with the facility representative.
