GRAND CANYON DEER FARM LLC

Type: ROUTINE INSPECTION
Date: 08-AUG-2017

2.40(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

One Sika Buck and one Fallow Buck were observed to have overgrown hooves. The toes on both bucks were long and were turning inward due to a lack of recent hoof trimming. Failure to appropriately maintain hooves/nails can cause gait abnormalities which could be painful or cause injuries. As part of the facility's program of preventative veterinary care, the licensee must ensure that all animals receive appropriate hoof and nail care in a timely manner.

Date to be Corrected: August 15, 2017

3.125(a)

FACILITIES, GENERAL.

In the large deer enclosure some of the metal fencing protecting the trees was in disrepair. Portions of the fencing were creating several sharp points that were pointing outward in the enclosure. Also, in the deer shed there were two screws that were pointing outward where the deer could easily come into contact with the sharp points.

The secondary fence the licensee was building in front of the Fallow Buck's pen had exposed sharp points that were exposed in the Fallow Buck's pen and in the Miniature Donkey's pen. The buck and donkey can become injured if they come into contact with these exposed sharp points of the fence.

In the Fallow Buck's pen the corner of the shed's tin roof was bent downward and created a sharp exposed edge that could come into contact with the buck and cause injury.

All enclosures must be kept in good repair and free of sharp points and protruding edges in order to protect the animals from injury. A system of timely identification, facility repair, and maintenance must be in place.

Inspection Report

WATERING.

In a few of the animal pens, the black plastic drinking bowls were dirty and had a green slimy film on the interior sides and bottom. In some bowls there was a green, brown slimy film on top of the water in addition to covering the interior of the bowls. It is the responsibility of the licensee to make sure all water receptacles be kept clean and sanitary for the overall health and well-being of the animal.

Date to be Corrected: August 22, 2017

This inspection and exit briefing were conducted with the facility's owner.
