NOAHS ANIMAL ADVENTURES INC

Type: ROUTINE INSPECTION
Date: 07-MAY-2014

3.58(a)

CLASSIFICATION AND SEPARATION.

Section 3.58(a) Classification and separation: The three rabbits were housed in the same primary enclosure with six chickens. The birds and their feces are a potential source of bacteria and parasites that may cause the rabbits to become ill. Rabbits must not be housed in the same primary enclosure with any other species of animals. The rabbits and chickens must be in separate enclosures. The licensee began preparations to house the rabbits in their own enclosure during the inspection.

Correct by May 8, 2014.

An exit briefing was conducted with the licensee.
