Type: ROUTINE INSPECTION
Date: 23-MAR-2020

3.26(b)

FACILITIES, INDOOR.

Ventilation. There was a strong ammonia odor throughout the indoor guinea pig room. Three windows were open on two opposing walls, but the windows were not sufficient to provide adequate ventilation. According to the licensee enclosures were last cleaned on March 14, 2020. Failure to provide fresh air can expose the guinea pigs to potential disease hazards, and not cleaning soiled bedding often enough can increase ammonia levels. The indoor housing facilities must be ventilated to minimize odors and ensure the health of the guinea pigs. Licensee must ensure that housing areas are adequately ventilated to provide the health and comfort of the animals. Correct by March 28, 2020.

3.31(a)(1)

REPEAT

SANITATION.

There is a buildup of dirt, dust, grime, feces, soiled bedding, cobwebs, and debris on walls and floors of enclosures. According to the licensee the enclosures were last cleaned on March 14, 2020. The accumulation of dirt, dust, grime, feces, soiled bedding and cobwebs can expose the guinea pigs to potential infections with bacteria, fungi, and parasites. Too much dirt, grime, feces, and soiled bedding is accumulating between the cleaning interval. Correct by ensuring that all primary enclosures are cleaned and sanitized often enough to prevent an accumulation of feces, dirt, grime, soiled bedding, and debris.

3.31(b)

SANITATION.

Housekeeping. There are accumulations of dust, dirt, hay, cobwebs, and debris, on windows, window sills, walls, equipment, drainpipes, shelves, hoses, ceiling, and enclosures. Animal facilities must be kept clean to ensure good quality of air for the animals and to prevent unnecessary disease risks. Ineffective cleaning exposes the animals to disease hazards and health problems. Correct by ensuring the premises are kept clean, including removing accumulations of dust, dirt, hay, cobwebs, and debris; routinely dusting off and cleaning surfaces; and maintaining a level of general cleanliness to support good animal husbandry and health. Correct by March 28, 2020.
