2.131(c)(1)

HANDLING OF ANIMALS.

***There is an elk with a mean disposition that is being exhibited in a barn stall. The barn stall has bars in which the public could reach in and possibly get injured by the animal. The aren't any barriers in place to prevent public contact. During public exhibition, any animal must be handled so there is minimal risk of harm to the animal and to the public, with sufficient distance and/or barriers between the animal and the general viewing public so as to assure the safety of animals and the public. Correct by October 6, 2016.

3.125(a)

FACILITIES, GENERAL.

** The primary fencing for the kangaroo, zebra, llama, alpaca, sheep, goats, watusi and bison are constructed with barbed wire. In the goat pen off of the barn there was also a long strand of curled hot wire along the ground of the fence line. In the zebra, elk and bison enclosure there were areas where pointed wires and nails were protruding . These injurious materials must be removed to prevent the animals from being harmed. The outdoor housing facilities shall be structurally sound and shall be maintained in good repair to protect the animals from injury and to contain the animals. Correct by November 22, 2016.

*** The goats shelter behind the barn has an opening in the back of it between two pieces of sheet metal. This could potentially injure the animals. The outdoor housing facilities shall be structurally sound and shall be maintained in good repair to protect the animals from injury. Correct by October 30, 2016.

3.125(c) REPEAT

FACILITIES, GENERAL.

***The feed bags were on the floor and open in the storage room. The storage room door was open and the window was open allowing pest to easily come in and contaminate the feed supply. Supplies of food shall be stored in facilities which adequately protect such supplies against deterioration, molding, or contamination by vermin.

This inspection and exit interview were conducted with the owner.
