### **SANITATION.**

\*\*\* At the time of this inspection a number of rats were noted both in and around the main bear enclosure.  
Because rodents may carry disease agents and because they may cause the bears physical injury, a safer and more effective program of control than presently exists must be established.

Correct by 6/23/14

NOTE This inspection was conducted on 6/9/14 and 6/13/14.  
An exit interview was conducted with the licensee on 6/13/14.
