Customer ID: **6764**

Certificate: **93-C-0554**

Site: 001

Stanislaus Wildlife Care Center

Type: ROUTINE INSPECTION

Date: 07-AUG-2025

---

### 2.75(b)(1)

#### Records: Dealers and exhibitors.

The facility acquisition and disposition records did not accurately reflect the animals observed on inspection. A single enclosure contained 7 Scrub Jays but only 1 was recorded on the acquisition records. The other 6 birds within the same enclosure were part of their wildlife rehabilitation program and waiting for release. Complete and accurate records are needed to ensure each animal can be known with certainty and facilitate the ability to trace all animals. The licensee shall make, keep and maintain records or forms which correctly disclose the required information concerning animals other than dogs or cats, purchased or otherwise acquired, or which is transported, sold, euthanized or otherwise disposed of by the exhibitor, including any offspring born.

Correct by: 8/14/2025

### 3.158(a)(1)

#### Cleaning, sanitization, housekeeping, and pest control.

The screech owl/kestrel enclosure, red tail hawk/swainson's hawk enclosure, and scrub jay enclosure were observed to have a buildup of wet excrement, food waste, and spider webs covering the walls and floors. Insufficient cleaning can lead to disease hazards, insects, pest and odors. Excreta and food waste must be removed from within, under, and around the primary enclosure often enough to prevent excessive accumulation.

Correct by: 8/14/2025

This inspection and exit interview were conducted with Facility Representative.
