Type: ROUTINE INSPECTION
Date: 06-NOV-2018

3.131(c)

SANITATION.

In the commissary / food preparation area the following was noted:

1) There was discarded meat on the ground and lodged in a crack of a damaged baseboard. 2) At least 3 buckets located over the sink, used to contain animal diets, were worn and stained. 3) A mop used for cleaning was propped up next to the sink. 4) At least 2 metal food storage racks were rusted. A knife was placed directly on one of the racks. 5) Two peacock bird feathers were noted lying on the racks in the meat thawing area. 6) Some of the surfaces indoors and out did not appear to be adequately sealed which may allow dirt, debris or other organic matter to accumulate and prevents effective cleaning practices.

Food preparation areas should be kept clean and in good repair to facilitate the prescribed husbandry practices set forth in this subpart.

A system of effective cleaning to be corrected by November 23, 2018

Wood repair/ replacement and sealing to be corrected by February 1, 2019
