City Of Overland Park
8500 Sante Fe Dr
Overland Park, KS 66212

Customer ID: **4082**
Certificate: **48-C-0170**
Site: 001
City of Overland Park

Type: ROUTINE INSPECTION
Date: 02-AUG-2016

3.127(d) REPEAT

FACILITIES, OUTDOOR.

The following areas of perimeter and enclosure fencing are in need of repair.

- * Near the walking path, a section of perimeter fencing has become detached and is extending inwards. In addition, another section of perimeter fencing near the walking path is loose and needs to be reattached to make the fencing secure.
- * There are two separate areas in the perimeter fencing next to the walking path where there is an estimated six inch gap between the perimeter fencing and the ground below.
- * The enclosure fencing used to contain seven goats has one area where the fencing has become detached creating an estimated four to six inch gap at the bottom. The fencing is extending inwards towards the goats.
The gaps created by the detached perimeter fencing and the area between the perimeter fence and the ground below do not restrict animals and unauthorized persons from gaining contact to the animals in the facility. The facility must have in place an effective and customary containment with security measures for the animals in the facility. The licensee must establish and adhere to a method of fence maintenance to ensure that all fencing securely contains the animals within and prevents unauthorized persons or animals from entering or having contact with the animals.
- * The facility inspection and verbal exit briefing done on 8/2/16 were conducted with the Director, Animal Care Supervisor, Angela DePoe ACI and Robert Bacon ACI.
- * Exit briefing done on 8/3/16 were conducted with the Director, Animal Care Supervisor and Robert Bacon ACI.

Additional Inspectors

Depoe Angela, Animal Care Inspector
