SOCIETY

Type: ROUTINE INSPECTION

Date: 09-DEC-2024

---

### 3.125(a)

#### Facilities, general.

At approximately 5:15pm on Friday December 6, 2024, the adult male warthog, Mataeo, was able to break out of his enclosure by breaking metal bindings on an unused gate. Staff in the area were alerted by the sound and the facility's escaped animal plan was initiated. The warthog remained within the perimeter fence and was recaptured the same day. There were no apparent injuries on veterinary exam. The wart hog was moved to a new enclosure. The enclosure containing the warthog must be structurally sound and maintained in good repair to protect the warthog from injury and contain him at all times. A failure in this could lead to injury or escape from the facility. Corrected at time of the inspection, December 9, 2024.

This inspection and exit interview were conducted with facility representatives.
