### 3.75(b)

#### Housing facilities, general.

Housekeeping at the facility must be addressed, especially around the produce, that is stored in bins along the front wall of the facility. On the top of the bins, are miscellaneous items such as: tools, gloves, a blanket for the primates, towels, crackers, gum and a coffee cup. Storing these items directly on the produce bins does not protect the food supplies from potential contamination.

The equipment used for cleaning is currently hung along the walls with shavings and debris on them. These cleaning tools should be cleaned prior to being stored to promote good husbandry practices. Lastly, there is general clutter around the facility that needs to be removed to help maintain good housekeeping standards at the facility.
