### 3.11(c)

#### **Cleaning, sanitization, housekeeping, and pest control.**

A refrigerator used to store animal clinical testing supplies (microbiological plates), and small amounts of food requiring storage under refrigerated conditions, had multiple patches of black material on the rubber seals closing the doors. Refrigerators that are contaminated may also contaminate food and/or testing supplies. The facility must ensure cleanliness of refrigerators to facilitate good husbandry practices and maintain wholesome diets.

Correct by close of business 04/20/2022.

This inspection and exit interview were conducted with the facility representative.
