### 3.127(d)

#### Facilities, outdoor.

Two adult red foxes are enclosed in an outdoor primary enclosure that lacks a perimeter fence on the East side of the enclosure. There is a 4 foot public barrier on the East side but this species requires at least a 6 foot perimeter fence. Perimeter fences are important to prevent contact or entry to the enclosure by predators and unauthorized persons. This could potentially cause injury or illness to the animals.

The facility must have a perimeter fence appropriate for the species being housed or have an approved variance by the Administrator.

To be corrected by: 19-September-2023

This is a 1st Re-License Inspection for a Class "C" license. The inspection and exit briefing were conducted with the applicant.

All items must be in compliance within 2 more inspections or by 18-November-2023 or the applicant will forfeit the license fee and must wait 6 months to reapply. Please contact your inspector to schedule your next Re-License Inspection.

Regulated activity can continue under your existing USDA license until it expires.
