Site: 001

WEBERS WILDERNESS WALK INC

Type: ROUTINE INSPECTION

Date: 15-SEP-2015

2.40(b)(2)

REPEAT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

The yak has overgrown hooves on all four feet and the back hooves are beginning to curl upward in an elf shoe appearance. The yak also has a large area of matted hair on her left side and areas of matted hair on her legs. Overgrown hooves can be painful and can lead to other health issues such as problems walking normally if not treated. Also, matted hair can be painful and can lead to other health problems such as skin infections if not addressed in a timely manner. Correct by providing appropriate hoof and hair care to the yak.

Inspection and exit interview conducted with facility representatives and ACI Wilken.

End of report.
