Site: 001
JUSTIN HURST

Type: ROUTINE INSPECTION
Date: 17-AUG-2021

2.75(b)(1)

Records: Dealers and exhibitors.

A current records of guinea pigs on hand was not available for review. Approximately 201 guinea pigs were counted during this inspection including adults, weanlings, and newborns. There were no inventory records indicating the number of adults, weanlings, or newborns present for the 2021 calendar year. Failure to maintain these records can make it difficult to assess the health of the caviary by identifying animal losses by deaths, number of animals born, and to track animals being used in regulated purposes. The licensee must maintain records containing the required information which fully and correctly discloses the number of animals held, owned, acquired or disposed of including births and deaths. Correct by August 21, 2021.

3.31(b)

Sanitation.

Housekeeping. There are accumulations of dirt, debris, clutter, rodent droppings on the floor of the animal room by the cabinet and in the adjacent storage area. Animal facilities must be kept clean to prevent hiding and living areas for pests. Correct by ensuring the premises are kept clean, including: removing clutter from the storage room, and cleaning dirt, debris, and rodent droppings from the floor and top of cabinet. Correct by August 21, 2021.

This inspection and exit interview were conducted with the licensee.
