Site: 001

WESTGATE RIVER RANCH  
RESORT

Type: ROUTINE INSPECTION

Date: 02-MAY-2023

---

### 2.134

#### Contingency planning.

A contingency plan has not yet been developed at this facility . Developing a plan that outline actions to take in emergency situations is necessary to protect animal health and well being . Dealers, exhibitors, intermediate handlers, and carriers must develop, document, and follow an appropriate plan to provide for the humane handling, treatment, transportation, housing, and care of their animals in the event of an emergency or disaster (one which could reasonably be anticipated and expected to be detrimental to the good health and well-being of the animals in their possession).

CORRECT BY : 5/16/2023

### 3.127(d)

#### Facilities, outdoor.

The enclosures which house the wallabies and the white-tail deer does not have an adequate perimeter fence. Most of the premises is surrounded by a perimeter fence that is less than 6 feet tall. A perimeter fence protects animals from contact with unauthorized people and animals. A perimeter fence also acts as a secondary containment system if an animal escapes from its primary enclosure. Correct by installing a perimeter fence that is of sufficient height to keep animals and unauthorized persons out, and to act as a secondary containment system for animals in the facility.
