### 2.40(b)(1)

#### Attending veterinarian and adequate veterinary care (dealers and exhibitors).

The facility does not have the availability of appropriate equipment and personnel to safely trim long nails on their wallabies. There are three agile wallabies with extremely long nails, causing their associated toes to twist and turn to the side. According to the facility, they have been in contact with their attending veterinarian for the past several months discussing the use of pharmaceutical drugs to facilitate safely trimming the nails without overly stressing the animals. Currently, they are waiting on their veterinarian to obtain the medication. Animals with excessively long nails can cause abnormal twisting and pressure on the bones and joints of the toe, leading to unnecessary injury and discomfort in the animal. Correct by 19 March 2024 by ensuring the facility has a Program of Veterinary Care that adequately provides for appropriate facilities, personnel, equipment, and or services to maintain all animals in good health and provide for good welfare.

This inspection and exit interview were conducted with facility representatives.
