Type: ROUTINE INSPECTION
Date: 18-APR-2017

2.40(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

* An black and white, female, Shih-Tzu born on 5/26/06 and identified by (#081-575-354) and 'Confetti Cowgirl' has a thick buildup of tarter covering the surface of its canine, front and cheek teeth. The layer of tarter coating the affected teeth has a dark brown appearance. There are also areas of reddened gums and gum recession along the top of the cheek teeth.

The abnormal buildup of material on teeth can cause damage to the gum tissue and tooth structures, be painful and harm the health of the animal.

The licensee must have this animal examined by a veterinarian to obtain an accurate diagnosis and appropriate treatment plan. Additionally, the licensee needs to consult the attending veterinarian to develop and follow a dental maintenance plan. The outcome of this consultation must be documented and provided to the inspector upon request. The licensee must ensure that all animals receive adequate veterinary care at all times.

To be corrected by: April 26, 2017.

* A tri-colored female Basset Hound, named "Custard", born 6-28-2013, (ID#: 0A01795351) had excessively toe nails on all four paws. A tri-colored female Basset Hound, named "Lucky Lady ", born 3-18-2015, (ID#: 900032002685740), right front paw had excessively long toe nails. A female tri-colored Beagle, named "Texas Two Step", born 9-05-2010, (ID#0A01233177), two front paws had excessively long toe nails. Some of the toe nails, for all the mentioned dogs, are laying sideways when the dogs are in a normal standing position. Long toe nails can be painful and cause discomfort and affect the dogs gait when a dogs are trying to walk. The potential for injury exists if a toe nail becomes caught in the plastic flooring.

For the prevention of injury and discomfort to normal gait for the dogs, the licensee must ensure that the toe nails are trimmed on a regular basis or have a toe nail maintenance plan in place.

The correction date for the three mentioned dogs with long toe nails is: 22-April-2017.

Inspection Report

* A blue and white female French Bulldog, named "Belle Olivia", born 1-16-2015, (ID#:0A02450829) had moderate hair loss inside the right ear. There was a dark red growth approximately ½ inch in diameter in the ear canal. There was an accumulation of dark waxy material inside the ear canal around the growth. The licensee stated, a licensed veterinarian verbally told her to clean the ear and treat with "Zymox" four to five drops once a day. There was no written documentation from the veterinarian on the proper use of this medication. This growth and buildup of dark waxy substance can cause pain, discomfort and other disease problems.

This dog must be seen for additional consultation and treatment by a licensed veterinarian for the right ear. The documentation for this consultation must be available to the inspector upon request.

This dog must be seen by the: 29-April-2017.

3.11(a)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

* The under neath waste pits for the enclosures in the East Barn Kennel, housing 102 adult dogs, had an accumulation of fecal and fluid waste. There was a strong sewage odor present inside the building. The odor can affect the animals and this can attract insects and pests. The owner stated, that he had just washed the runs down.

For the prevention of strong odors, insects and pests, the under neath waste pits must be flushed more frequently for the enclosures.

To be corrected by, 20-April-2017.

This inspection and exit interview were conducted with the licensees, Randall Wagner, ACI and Corbin Ranslem, ACI.

This inspection will be sent by certified and regular mail.

USPS Tracking #: 9590940227566351142097.
