

## Inspection Report

University Of Colorado-Boulder  
2860 Wilderness Place, 603 Ucb / Room 122  
Boulder, CO 80301

Customer ID: **1835**  
Certificate: **84-R-0060**  
Site: 005  
MCDB-GOLD & Wilderness

Type: ROUTINE INSPECTION  
Date: 12-JUL-2018

### 3.130 CRITICAL

#### WATERING.

\*\*\*Potable water was not accessible in an enclosure containing two adult voles and a litter, resulting in the death of the lactating, female vole.

Facility records indicate that on January 8, 2018, the vole cage was changed and the water bottles were flipped around, with the sipper tubes not accessible to the voles. The staff member did not replace the bottles to their normal position. During daily observations of the animals on January 9th and 10th, the facility staff did not identify the mistake and did not correct these flipped water bottles. On the morning of January 11, facility staff discovered the dead vole and the flipped water bottles. The voles in the enclosure did not have access to water for at least two full days. APHIS inspector learned of the incident while going through facility documentation during an inspection.

Lack of access to potable water can cause an animal to experience dehydration and lead to other medical issues, including death. The facility must ensure that if potable water is not accessible to the animals at all times, it must be provided as often as necessary for the health and comfort of the animal.

To be corrected from this date forward.

This inspection and exit interview were conducted with facility representatives.
