### 3.6(a)(1)

#### Primary enclosures.

\*\*\* Two enclosures have sections of wire that are broken creating gaps between enclosures with sharp edges pointing inward. These sections of wire must be maintained in good repair for the safety of the dogs.

\*\*\* Multiple enclosures have wire coated flooring where the plastic coating is coming off the wire, exposing some thinner wire strands. These coated floors must be maintained in good repair to keep the enclosure structurally sound and to protect the dogs feet from injury.
