### **Environment enhancement to promote psychological well-being.**

The written avian environment enhancement plan is underdeveloped for the sections regarding social grouping and environmental enrichment. The birds at the facility were socially housed and were provided with materials to enhance their environment during inspection. Failure to adequately develop, document and follow a species-appropriate plan for environment enhancement of regulated birds may result in their poor psychological welfare. Exhibitors must develop, document and follow a species-appropriate plan for environment enhancement adequate to promote the psychological well-being of birds. The plan must be approved by the Attending Veterinarian and must be in accordance with currently accepted professional standards as cited in appropriate professional journals or reference guides. Correct by ensuring that a complete, documented plan for environmental enhancement that addresses the required elements and is approved by the attending veterinarian is maintained and available for inspection.

This inspection and exit interview were conducted with the facility representatives.
