Type: ROUTINE INSPECTION
Date: 21-AUG-2018

3.11(a)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

On the East side of the sheltered adult housing facility, there was more than a day's accumulation of feces in the outdoor portions of 6 enclosures, housing 22 adult dogs. The feces were throughout the enclosures and the dogs could not avoid walking through them, as evidenced by multiple fecal piles smashed into the concrete floor. Several feces had a white mold-like discoloration and there was a strong odor of excrement that could be smelled from several feet away. Accumulations of excreta within animal enclosures creates an unhealthy environment and can cause health hazards for dogs. The licensee must ensure that all waste material is removed from the primary enclosures daily, as required, to prevent soiling of dogs and to reduce disease hazards, insects, pests, and odors. Correct from this day forward.

This inspection and exit interview were conducted with a facility representative.
