Sanitation.

The enclosure for two striped skunks and the enclosure for the kangaroo has numerous cobwebs inside and around the pens. These pens need to be properly cleaned, and the facility should institute a program of routine cleaning. Failure to adequately clean animal facilities can lead to unsanitary conditions which may negatively impact the health of the enclosed animals. Premises must be kept clean and in good repair to facilitate prescribed husbandry practices. To be corrected by 12-20-2024.

This inspection and exit interview were conducted with the licensee.
