Certificate: 23-R-0046
Site: 001
BUCKNELL UNIVERSITY

Type: ROUTINE INSPECTION
Date: 21-JUN-2017

2.33(b)(1)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE.

During the inspection, a bottle of euthanasia solution was found past its expiration date. This bottle was available for use should the need arise and not clearly marked as expired or to be disposed. None of the ongoing animal activities require routine use of euthanasia solution; however, it is maintained on hand for medical euthanasia purposes. When alerted that the bottle was out of date, the IACUC chair stated that the bottle would be disposed of properly and that the committee would ensure proper expiration dates for all medications are being observed by all study directors and animal care staff. The use of expired drugs, particularly those for anesthetic, analgesic, and euthanasia purposes, is not consistent with adequate veterinary care. Medications are not guaranteed to be effective and/or safe past their expiration dates. Correct by establishing a program of veterinary care that allows for the availability of appropriate equipment, including medications, to provide adequate veterinary care.

Correct from this time forward.

This inspection and exit interview were conducted with the IACUC chair and animal care staff.
