Town of West Hartford
119 Flagg Road
West Hartford, CT 06117

Customer ID: **1942**
Certificate: **16-C-0008**

Site: 001
Town of West Hartford

Type: ROUTINE INSPECTION
Date: 03-SEP-2024

2.40(b)(2) Critical

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

A rabbit (named "Pie") became wounded in the groin by trauma of an unknown origin. The wound was not observed for at least one week according to a facility representative. This wound became infested with maggots over an indeterminate period of time, after which it was observed by a volunteer at the facility. After the wound was discovered, the facility representative brought the rabbit to an emergency veterinary clinic the same day. According to the veterinarian's description of the wounds, they were deep and extensive. The rabbit was provided appropriate veterinary care at this time and was euthanized. Each dealer and or exhibitor shall establish and maintain programs of adequate veterinary care that include the use of appropriate methods to prevent, control, diagnose, and treat diseases and injuries. Correct by September 3, 2024.

3.56(a)(1)

Sanitation.

The primary enclosures housing 9 rabbits have an excessive accumulation of fur, cobwebs, and general organic debris on the wires. These materials prevent the proper cleaning and sanitization of the primary enclosures. Primary enclosures shall be kept reasonably free of excreta, hair, cobwebs, and other debris by periodic cleaning. Correct by September 6, 2024.

3.125(a)

Facilities, general.

An area of wire fencing in a pasture used for domestic hoofstock, llama, and alpacas has been damaged due to a mower strike, with numerous sharp points exposed. The damaged wire was noted in the section of fencing that separates the two areas of pasture. These sharp points can cause injury to the animals. Outdoor housing facilities shall be maintained in good repair to protect the animals from injury. The facility must make repairs to or replace the damaged section of the wire fence. Correct by September 17, 2024.

This inspection and exit interview were conducted with a facility representative.
